They consider information security when designing a network and decide what hardware, routers or adaptor, and software is required to support the network. Read about Computer Network Support salaries, related jobs and salary information across the UK Computer Network Support Salary data from the ONS Salary by Region Compare Computer Network Support salaries across different regions Region Salary Scotland £25,430.73 Wales £27,150.46 Northern Ireland £19,322.52 East Midlands £25,981.32 Eastern £25,643.56 London £29,217.08 North East £25,375.63 North West £25,457.94 South East £26,375.62 South West £23,909.88 West Midlands £25,454.23 Yorkshire and the Humber £25,180.53 The average salary for Computer Network Support jobs is a valuable metric for employees, employers, and candidates. The salary information can be a helpful insight when advertising jobs, making a job search, applying for jobs and negotiating salary. Newly qualified Computer Network Support basic salary Newly qualified Computer Network Supports should expect to start their career with a salary that is lower than the UK average earnings for the role. It can take several years working as a Computer Network Support to achieve the average UK salary. Your initial per year salary may also be influenced by factors such as the region and city where you work, with London typically offering more than other major cities. Whether you work in England, Scotland, Wales, or Northern Ireland will also alter the job's average gross and net earnings. Fully qualified Computer Network Support salaries Your experience level directly affects where in the salary range your earnings will fall. Senior salaries are usually achieved by those who become fully qualified in their field. Computer Network Support career development In the Information Technology (IT) industry, you might be rewarded for the number of years you have worked with the employer. However, promotions and higher pay per year cannot always be achieved by remaining in the same department or company. Professional development and specialising in a specific area will warrant an appropriate salary increase. Still, you might need to consider setting up a job alert, making a job search, and moving to another company or department to maximise your earnings or find relevant opportunities for progression. Computer Network Support take home pay In the United Kingdom, your career decisions should not be solely focused on take-home pay. Your average total compensation may include benefits that offer more value than a paycheck. For example, health insurance, a company vehicle, part or full-time remote working, company share schemes, higher paid annual holiday days, a short commute, and maternity and paternity leave are benefits that can contribute towards your living standards, work/life balance, and job satisfaction. A pay rise can raise your earnings per year and should be compared against the Information Technology (IT) industry average salary pay rise. Comparing your salary rise against metrics such as inflation will tell you if you will be better or worse off during the following year. It would help if you also weighed up your pay increase against the nation's cost of living increase. If you intend to negotiate a rise above the UK average salary, you will need facts, figures, and percentages to quantify your rise. Before negotiating better pay rates, you should prepare yourself for the discussion. Bring together all the evidence that adds weight to your case for a higher salary, including the average Computer Network Support wage, your qualifications, achievements, and recognition. Get paid more than your job's average base salary with further training Further qualifications and training will help you increase your average earnings. Training options include job-relevant diplomas, A levels, and degrees. Completing a course on a specific topic, application, or equipment will also improve your earning potential. Earn more per year with extra shifts Working overtime is another option that will help you be paid more than an average salary for your job. If your personal circumstances and commitments allow, you could also work unsocial hours with an hourly pay rate higher than your standard hourly rate. £34,659 /yrAverage Base Pay79 salariesNot enough reports to show salary distributionNo additional cash compensation has been reported for this roleHow much does a Computer Networks make?
